August 31st, 2019

To the EPA and Valois Robinson

You have issued revised draft permits for mining water wells and disposal wells for the proposed uranium mine on the southwest edge of the Black Hills (Powertech's Dewey-Burdock project). While Powertech has known this would happen in late August for over 6 months, the public has just been told in the last few days. This means the company has had plenty of time already to get their information and comments gathered. The public is only being given a little over 30 days to study and respond to hundreds of pages of information.

We request additional 90 days for public comment on the revised Dewey-Burdock underground injection control permits. Prairie Hills Audubon Society, is a SD Non-profit Corporation, as such under SD law we are a "person".

Nancy Hilding  
President  
Prairie Hills Audubon Society

I request this on behalf of the Society and myself as an individual.

=====  
Nancy Hilding
